VALLEY FOLD

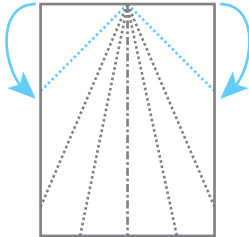

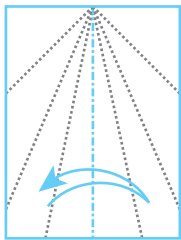

## INSTRUCTIONS

### AIR MAIL PAPER PLANE

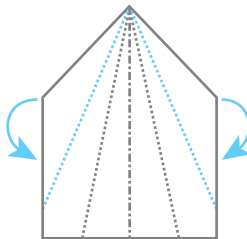

1

Cut out rectangle along outer solid line and crease center line and unfold. Mountain fold corners back.

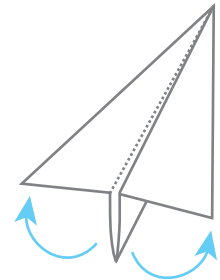

2

Mountain fold along diagonal lines on wings, then repeat.

3

Valley fold plane along centerline and open wings.

The plane is complete!  
Learn flight tips from Skipper to  
Start flying!

### SKIPPER'S FLIGHT SCHOOL

1

Adjusting the Wings:

Keep the wings level slightly upward in hand so they are level when in flight.

2

How to Throw:

The dart may be thrown at medium to high speeds which allows it to be thrown upward as well as horizontally with smooth arcing flights.

3

Flight Tips:

If the plane stalls, bend the rear wing edges downward to keep the nose down.

Tilt wings further up to lower center of gravity and prevent the plane from rolling upside down in flight.
