MOUNTAIN FOLD

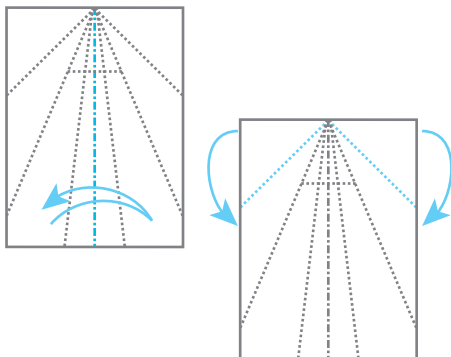

VALLEY FOLD

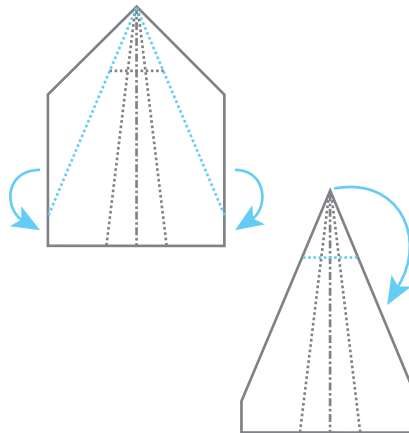

## INSTRUCTIONS

### STRIPES PAPER PLANE

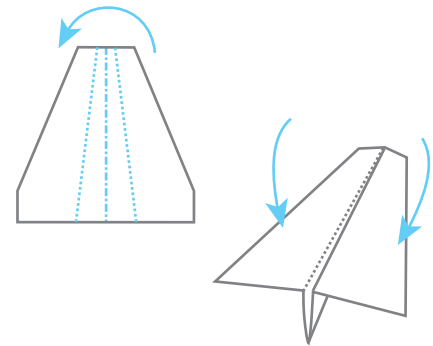

- 1** Cut out rectangle along outer solid line and crease center line and unfold. Mountain fold corners back.

- 2** Mountain fold along outer diagonal lines on wings, then mountain fold the nose back.

- 3** Valley fold plane along centerline and mountain fold open wings.

The plane is complete!  
Learn flight tips from Skipper to  
Start flying!

### SKIPPER'S FLIGHT SCHOOL

- 1** Adjusting the Wings:

Keep the wings slightly upward in hand so they are level when in flight.

- 2** How to Throw:

The snub nose adds weight to the front of the plane, which allows it to be thrown quickly and at a variety of angles similar to the AIR MAIL plane.

- 3** Flight Tips:

Tilt the rear edges of the wings upward if the extra weight in the front causes the plane to nose dive.
